PROFESSIONAL SUMMARY

Software Engineering undergraduate at LNBTI (GPA 3.72 / 4.00) with hands-on full-stack and mobile development experience using React, Next.js, Node.js, Laravel, Kotlin and React Native. Freelance experience building real-time, map-based dashboards and integrating Google Maps, Firebase, Supabase and OpenAI APIs. Experienced in REST APIs, relational and NoSQL databases, testing and Agile teamwork as a group leader, with a strong interest in AI-powered products.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, Java, Kotlin, C#, C++, SQL

Web & Mobile: React.js, Next.js, Node.js, Laravel, Tailwind CSS, Bootstrap, React Native, Android SDK (Kotlin), Flutter (basic)

APIs & AI: REST APIs, OpenAI API, LLM APIs (Groq), Google Maps API, Zoom API, Authentication

Databases & Cloud: MySQL, PostgreSQL, MongoDB, SQL Server, Firebase, Supabase, Git, GitHub, Docker, Vercel, Netlify, Basic AWS

Practices & Design: OOP, Data Structures & Algorithms, Agile/Scrum, Debugging & Testing (Manual, Selenium (basic)), Jira, Trello, Figma (UI/UX)

Languages Spoken: English (Business Level), Japanese (NAT N5 passed, studying N3), Sinhala (Native)

WORK EXPERIENCE

Freelance Software Developer April 2026 – September 2026
ShaloTrack | Western Province, Sri Lanka

- Built a real-time fleet management web dashboard using React, Google Maps API, Firebase and Supabase to monitor and manage vehicle tracking data.
- Integrated the OpenAI API to add AI-powered features to the platform.
- Developed and maintained native Android applications using Kotlin with REST API integrations.
- Executed manual test cases for real-time tracking and tracked defects in Jira/Trello through the full bug life cycle.
- Served as group leader and worked in Agile workflows using Git, collaborating on code reviews and troubleshooting.

PROJECTS

AI Ticket Triage – Python & LLM API Automation (2026)
Built a Python tool that uses an LLM API (OpenAI SDK with Groq) to classify support tickets by category, priority and sentiment, draft replies, and generate CSV/Markdown reports. Includes retry handling, output validation, webhook alerts for urgent tickets and a unit-tested pipeline. Code: github.com/nethukw/ai-ticket-triage

EduChat – Peer-to-Peer Learning Platform (2025)
Engineered a full-stack educational platform with a Laravel backend and MySQL database, integrating the Zoom API for session scheduling, real-time discussion forums and an AI chatbot. Served as group leader.

TaskFlow – Cross-Platform Task Manager (Ongoing)
Developing a React Native mobile app integrated with a Node.js and Laravel backend via REST APIs, handling authentication and real-time data synchronization.

Next.js Developer Portfolio (2026)
Designed and developed a fully responsive web portfolio with Next.js to showcase software engineering projects and technical certifications.

Mood Matcher & VibeReads Bookstore (2024)
Built an e-commerce recommendation engine using PHP and Tailwind CSS, with automated Selenium test scripts to validate core functionality.

College Course, Vehicle & Pet Shop Systems (2024–2025)
Developed database-driven management systems using PostgreSQL, C++ and PHP/Bootstrap for operations, maintenance tracking and academic scheduling.

SmartLMS & Exchange Rate Converter (2024)
Built SmartLMS in C# to manage academic resources, and an Exchange Rate Converter in PHP for real-time currency calculation.

EDUCATION

BSc (Hons) in Software Engineering 2023 – Present
Lanka Nippon BizTech Institute (LNBTI) | Current Cumulative GPA: 3.72 / 4.00

G.C.E. Advanced Level – Biological Science Stream 2019 – 2021
Swarnamali Girls' College, Kandy

G.C.E. Ordinary Level 2018
D.B. Wijethunga National School, Kandy

CERTIFICATIONS & COURSES

- Project Management Course – University of Moratuwa (In Progress)
- Server Side Web Programming – University of Moratuwa
- Japanese Language Preparation – NAT N5 Passed
- Python Programming & Python for Beginners – University of Moratuwa
- Diploma in English – Esoft Metro Campus (2023)
- Business Ethics – LinkedIn Learning
