PROFESSIONAL SUMMARY

Software Engineering undergraduate at LNBTI with hands-on experience building responsive web applications using React, Next.js, Node.js and TypeScript. Freelance experience building real-time, map-based dashboards with Google Maps, Firebase, Supabase and OpenAI API integrations, alongside REST APIs, authentication, and relational and NoSQL databases. Passionate about startups, AI-powered products, and building features from concept to launch, with a strong commitment to clean code and Agile methodologies.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, Java, Kotlin, C#, C++, SQL

Web Development: React.js, Next.js, Node.js, HTML & CSS, Tailwind CSS, Bootstrap, Laravel

APIs & AI: REST APIs, OpenAI API, Google Maps API, Zoom API

Mobile: React Native, Android SDK (Kotlin)

Core Areas: Real-time Applications, AI Integrations, Recommendation Systems, Geolocation & Map-based Features, Authentication, Responsive Web & UI Design, SaaS Fundamentals

Databases & Cloud: Firebase, Supabase, MySQL, PostgreSQL, MongoDB, SQL Server, Git, GitHub, Docker, Vercel, Basic AWS

QA & Methodologies: Agile/Scrum, OOP, Manual and Automation Testing (Selenium)

Languages Spoken: English (Business Level), Japanese (NAT N5 passed, studying N3), Sinhala (Native)

WORK EXPERIENCE

Freelance Software Developer

April 2026 – September 2026

ShaloTrack | Western Province, Sri Lanka

- Built a real-time fleet management web dashboard using React, Google Maps API, Firebase and Supabase to monitor and manage vehicle tracking data.
- Integrated the OpenAI API to add AI-powered features to the platform.
- Developed and maintained native Android applications using Kotlin, with responsive UI/UX and REST API integrations.
- Performed manual testing against test cases for real-time tracking and tracked defects in Jira/Trello through the full bug life cycle.
- Worked in Agile workflows, collaborating with team members on code reviews and troubleshooting to ensure application stability.

PROJECTS

TaskFlow – Cross-Platform Task Manager (Ongoing)

Developing a React Native mobile app integrated with a Node.js and Laravel backend via REST APIs, handling authentication and real-time data synchronization.

Next.js Developer Portfolio (2026)

Designed and developed a fully responsive web portfolio with Next.js to showcase software engineering projects and technical certifications.

EduChat – Peer-to-Peer Learning Platform (2025)

Engineered a full-stack educational platform with a Laravel backend and MySQL database, integrating the Zoom API for session scheduling, real-time discussion forums and an AI chatbot.

Mood Matcher & VibeReads Bookstore (2024)

Built an e-commerce recommendation engine using PHP and Tailwind CSS, with automated Selenium test scripts to validate core functionality.

SmartLMS & Exchange Rate Converter (2024)

Built SmartLMS in C# to manage academic resources, and an Exchange Rate Converter in PHP for real-time currency calculation.

College Course, Vehicle & Pet Shop Systems (2024–2025)

Developed database-driven management systems using PostgreSQL, C++ and PHP/Bootstrap for operations, maintenance tracking and academic scheduling.

EDUCATION

BSc (Hons) in Software Engineering	2023 – Present
Lanka Nippon BizTech Institute (LNBTI) Current Cumulative GPA: 3.67 / 4.00	
G.C.E. Advanced Level – Biological Science Stream	2019 – 2021
Swarnamali Girls' College, Kandy	
G.C.E. Ordinary Level	2018
D.B. Wijethunga National School, Kandy	

CERTIFICATIONS & COURSES

- Japanese Language Preparation – NAT N5 Passed
- Python Programming & Python for Beginners – University of Moratuwa
- Server side Web programming – University of Moratuwa
- Diploma in English – Esoft Metro Campus (2023)
- Business Ethics – LinkedIn Learning
